

Wellness[®] Pro

...Get Results™

The Future of Bio-Electromedicine is HERE !!!

NEW Breakthrough
in Technology &
Medicine!

FDA CLEARED!

#1 choice of health care professionals!

A NEW World of possibilities that improve YOUR health and wellness!

The last decade has seen a major shift in the way Americans and people around the world view medicine. Despite the various benefits of pharmacological treatments, problems such as side effects and addictiveness have demonstrated to many in the medical community a need for investigation into new approaches to patient care.

Here in the United States more and more people are discovering alternatives to drug treatments and have found a powerful modality that works – **Electromedicine!**

Electro medical therapies now offer a viable and very effective alternative to drug therapies. Having been used in many other countries for decades, U.S. practitioners are now finding that there are many inherent advantages to Bio frequency technology.

Non-invasive, Non-toxic, Safe and effective!

The Wave of the Future!

An increasing number of clinics, hospitals and private practices, including practitioners in the allopathic and natural healing areas of medicine across the country, are discovering a device that is unlocking endless possibilities. The **WellnessPro** has shown to be by far the most effective Bio Frequency device on the market and #1 choice for professionals around the world.

What is Electromedicine?

Electromedicine is a discipline within the field of medicine that deals with the use of electricity and frequencies to aid in the treatment of a variety of physical ailments.

If you want to find the secrets of the Universe, think in terms of Energy, Frequency and Vibration
- Dr. Nikola Tesla

Here's what people are saying about the WellnessPro unit!

"...No More Pain Since Treatment!"

I had a patient come to me complaining of pain in the ball of her right foot for a year. She did not remember at first when the pain started or how. She had seen several doctors, a physical therapist and a chiropractor, used several kinds of rubs and nothing was helping. No diagnosis was made except "foot pain of undetermined etiology".

The doctor I work with referred her to me for a treatment. I treated her for 3 days. That was 3 months ago, and she has not had pain since! She is promoting the Wellness Pro to all her fellow workers and friends.

Nancy R.

"...I Feel Alive Again!"

I have been plagued with back problems most of my adult life. I have gone through back surgery three times. Each time it has given me temporary relief; several years after the second surgery the pain returned. To my wife's dismay, our social activities began to fade away. I could not comfortably walk any distance, sit, or stand for an extended period of time.

My niece introduced me to this unit. She has used the WellnessPro and was enthusiastic about the excellent results she has had using one. She begged me to try it before taking a chance on surgery again. The device was delivered to my home and I began using it immediately. No rash promises were made at the time the ElectroMedical device was left with me. In just a few days I began to feel improvement. In less than one week, the pain in my back and legs was gone. I feel a huge weight has been lifted from my mind and my body. Mentally and physically I feel alive again. I no longer dread going to bed, only to toss and turn in pain all night.

This device can be used for dozens of other ailments, not just to alleviate pain. I cannot say enough about how much this little device has helped. I was skeptical at first but now I am a true believer. Life is worth living now that I have been introduced to the Wellness Pro 2010 Electrotherapy Unit.

G. Mc Larney

"The WellnessPro has been a God-send for me. I have fibromyalgia, and most things I've tried have failed. A friend suggested this unit to me; I didn't know what to think. I told her I'll give it a try. At first I felt a little improvement, the next day we tried a different frequency and the pain in my legs was gone within 10 minutes!! I am amazed to say the least!!! I might still have fatigue, and my legs are sometimes stiff, but there is NO pain, as long as I use the machine once a week. More people should know about this!"

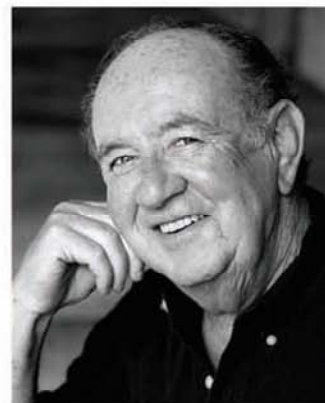

Jan.K

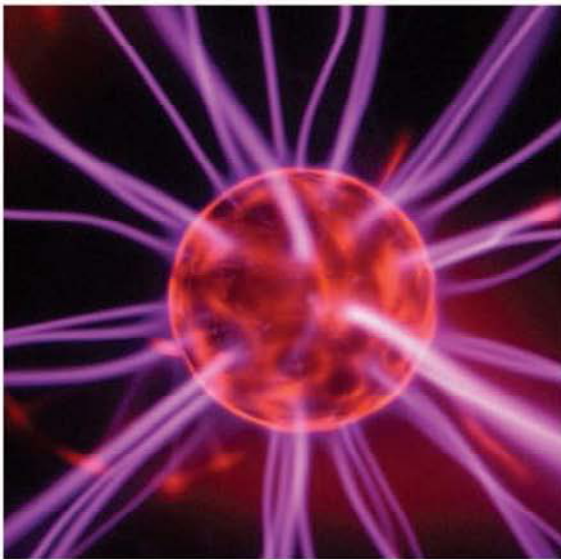

"...It's a Miracle Instrument!"

I have been seeing Doctors for years and they were unable to help me in any way with my type of arthritis which was in my knees, hips, shoulders, elbows, neck and various other places. I had been given a series of pain shots every five hours and been told I had a bad kidney infection. When one of my doctors recommended I look into getting a WellnessPro. I called the company, sent in my prescription and picked up my MACHINE from my Doctor.

All I can say is that I am at a loss of words. My pain stopped, the swelling is gone. Years of suffering and in less than 3 days of using this unit, I'm Pain Free! I just can't figure out how this works! If you believe in miracles, believe in the Wellness PRO! It's a miracle instrument.

J. McCall

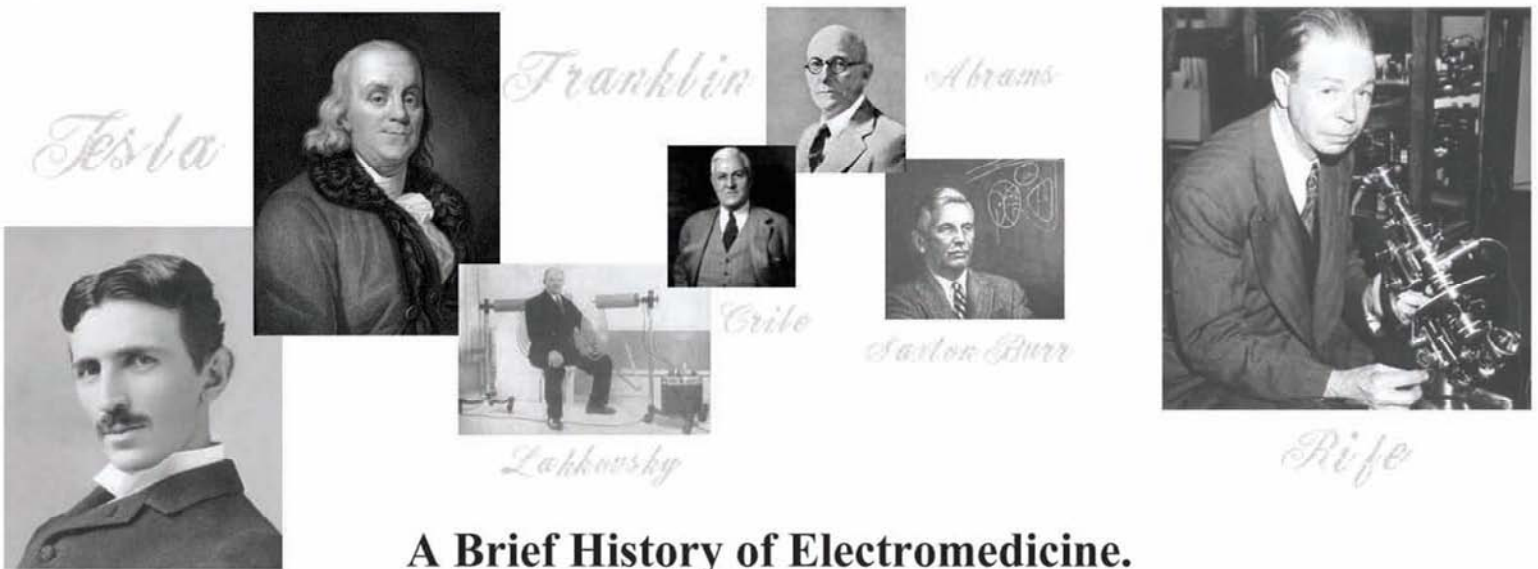

How Does it Work?

The human body is like a machine, it wears out in direct proportion to its abuse. A well balanced body reflects a strong immune system. Longevity is the result of natural care and maintenance of the body.

In basic terms, electricity is found naturally in all of us. Certain electrical impulses in our bodies help facilitate bodily functions including actions needed for healing. By mimicking the electrical impulses that occur in us, we can help facilitate a specific effect.

Electromedicine is able to trigger these impulses by varying the frequency, wave length, intensity, and location of the electricity applied to the patient. Understanding how these elements interplay to create a desired effect is the basis for the science.

A Brief History of Electromedicine.

Electromedicine, or the use of electricity to treat physical ailments, is considered one of the oldest and most documented sciences known. Medical professionals of ancient Greece learned that the electrical impulses emitted from electric eels in clinical foot baths relieved pain and produced a favorable influence on the blood circulation. Doctors Largus and Dioscorides (cc 46 AD) documented substantial therapeutic results with electrical currents in circulatory disorders and in the management of pain from neuralgia, headache and arthritis and gout.

In the 1700s, European physicians used controlled electrical currents from electrostatic generators almost exclusively for numerous medical problems involving pain and circulatory dysfunction. During that period, Benjamin Franklin also documented pain relief by using electrical currents for "frozen shoulder."

In fact in the early 1900's, approximately 50% of all U.S. physicians used electromedicine in their practice daily. Unfortunately for the science, an incorrect and unfair report emerged at this time. This report, produced by powerful special interest groups, discredited the value of both electromedicine and nutrition in medical practice. With fear of condemnation from certain medical institutions, (that were funded by these special interest groups), almost all American physicians abandoned electromedicine and nutrition from their practices.

Although nutrition has re-established itself as a credible medical discipline in the U.S., electromedicine is just now starting to emerge and is becoming more widespread and accepted for treatment of Pain.

Due to the unique technology, people are seeing the fastest and longest lasting results using the WellnessPro electrotherapy system. In summary, electromedicine is fast becoming recognized as a very safe, efficacious and certainly one of the most cost effective treatments of choice in 21st century that has ZERO side effects. Time will show other great benefits of electromedicine and its affects in restoring and maintaining functional homeostasis.

Electrotherapy Chronology

46AD (Ancient Rome) - Scribonius Largus describes the use of torpedo fish (aquatic animals capable of electrical discharge) for medical applications. "The live black torpedo when applied to the painful area relieves and permanently cures some chronic and intolerable protracted headaches... carries off pain of arthritis... and eases other chronic pains of the body."

1600 (England) - William Gilbert, physician to Queen Elizabeth, published *De Magnete*, in which he describes the use of electricity in medicine. Gilbert re-discovers that when certain materials are rubbed, they will attract light objects - originally known to be true of Amber by the ancient Greeks. He coins the name 'electricity' from the Greek 'electron' for amber.

1743 (Germany) - Krueger, a Professor of Medicine, suggests in lectures that electricity might be used in the treatment of paralysis.

1745 (Germany) - Kratzenstein publishes a book on electrotherapy. He details a method of treatment which consists of seating the patient on a wooden stool, electrifying him by means of a large revolving frictional glass globe and then drawing sparks from him through the affected body parts.

1780 (Italy) - Galvani, Professor of Anatomy at the University of Bologna, first observes the twitching of muscles under the influence of electricity (prepared from the leg of a frog). Galvani then proves that atmospheric electricity, as manifested in lightning, will produce the same effects on muscular movement.

1800 (Italy) - Carlo Matteucci shows that injured tissue generates electric current.

1840 (England) - England's first electrical therapy department is established at Guy's Hospital, under Dr. Golding Bird. The electrical discovery of Galvano leads to the use of mechanically pulsed Galvanic currents.

1860 (England) - The start of Faradic Stimulation. Bristow develops the Bristow Coil, using Faraday's principle of electro-magnetically controlling the voltage of electricity.

1891 (USA) - Nikola Tesla presents a paper in 'Electrical Engineer', about the medical application of high frequency currents. He notes that when the body is transversed by alternating currents above a certain frequency, heat is perceived.

1891 (France) - D'Arsonval, in a communication to the Société de Biologie, shows that a high frequency current (greater than 10,000Hz) can be passed through the body without producing any sensation other than heat. D'Arsonval demonstrates the ability of high frequency currents to modify physiological processes, including: respiratory exchange, dialation of peripheral blood vessels, arterial blood pressure.

1900 (Worldwide) - The electrical discoveries of Galvano, Faraday and Tesla were therapeutically adopted by activating the electrical phenomena of the human body with the use of Galvanic, Sinusoidal and Faradic currents. These become the standard methods of applying Electrical Body Stimulation. There becomes a preference to use the more comfortable and less hazardous Faraday method.

1908 (Germany) - Von Berndt, Von Priess and Von Zeyneck publish a paper on the treatment of joint disease by high frequency currents.

1929 (Russia) - Lakhovsky publishes his book "The Secret of Life". Conducts studies and concludes that cells possess resistance, capacitance, and inductance and function like tuned resonant circuits, capable of resonating to a resonant frequency when exposed to a range of frequencies.

1930's (Germany) - Interferential currents are developed. Two alternating, medium frequency sinewave current paths are crossed to give pulsed low frequency modes of electrical stimulation. Interferential currents are much more comfortable than anything else available at the time.

1938 (USA) - Clinics are opened in San Diego, Los Angeles and Pasadena, California. Phenomenal results are reported. A Special Medical Research Committee is organized at the University of Southern California in Los Angeles to oversee and manage Rife's "energy medicine" research and clinical success with a variety of disease conditions including cancer. The San Diego Evening Tribune reports that Rife's "energy medicine" has successfully destroyed the microbes associated with cancer and other diseases. The newspaper articles are cautious but optimistic.

1950's - 1990's (Russia) - 'Russian Stimulation' is developed - 4,000Hz tone bursts, 50% ON, 50% OFF, alternating currents with 50 tone bursts per second. This is used by athletes for building muscle and increasing power.

1970's (USA) - Transcutaneous Electrical Nerve Stimulation (TENS) is acknowledged as a viable method of pain management by America's Food and Drug Administration (FDA). Many American companies begin production of TENS devices. The heart pacemaker is developed.

1970's (England & Canada) - Melzak and Wall propose the 'Pain Control Gate' theory, by which strong afferent nerve stimulation by chemical, mechanical or electrical means overrides painful sensations at hypothetical pain control 'gates' in the spinal cord.

1970's & 80's (Sweden) - Clinical researchers Ericsson and Sjolund publish a series of articles in various scientific and medical journals. They compare constant, high frequency TENS to bursts of high frequency TENS (termed acupuncture-like TENS), finding that the latter offers better pain relief and does in fact instigate a release of endorphins into the bloodstream.

1981 (USA) - Becker publishes "The Body Electric". Challenges the established mechanistic understanding of the body. Finds clues to the healing process in the theory that electricity is vital to life.

1991 (Germany) – Nobel Prize recipients Erwin Neher and Bert Sakmann developed a technique that detects electrical currents of a trillionth of an Ampere in the membranes of the cell, establishing the existence of ion channels.

2000 - USA

John McDonald of Washington University uses intensive applications of Electrical Muscle Stimulation (EMS) to exercise the muscles of a quadriplegic of 8 years. The patient defies medical science by regaining limited sensation and movement in his body. The regimen includes 2 hours of EMS and hydrotherapy weekly.

2007 July - USA

After 4 years of development Electromedical Technologies receives FDA clearance for the Wellness Pro 2010. This NEW generation Bio-electrotherapy device combines decades of research from the ORIGINAL work of past Electromedical pioneers with new breakthrough technologies in this field. It is also the only unit of its kind on the market to go through the rigorous laboratory tests for safety accuracy and precision, receiving ISO, CE, ETL, UL and IEC marks. The NEW Wellness Pro Breakthrough "Deep Pulse" Technology, the largest frequency range and therapeutic features of this device show astonishing results with patient's health issues putting this device light years ahead of any other frequency unit on the market. The Future of Bio Electro medicine begins.

What is a WellnessPro device?

The WellnessPro is the easiest to use, most advanced device for pain control and injury trauma rehabilitation. **It is FDA cleared**, laboratory tested and registered through IEC, UL, ETL, CE and ISO. It is a Class II medical device with the most flexibility of use and largest frequency range in its class on the market today. It is digitally controlled and designed for the precise treatment to control even the most difficult pain, trauma and injury cases, including a wide variety of muscle and connective tissue and other health problems associated with PAIN.

The unique "Deep Pulse" technology, designed by world renowned scientists contained within the Wellness Pro is programmed to treat various body systems that have electrical irregularities in muscle, tendon, ligament, bone and fascia with frequencies that are capable of treating both acute and chronic disorders, as well as many other generalized health imbalances associated with pain.

How does this device work to reduce pain and assist with healing?

The WellnessPro assists the body to achieve homeostasis, which is its natural state of well being. It does this by relieving pain, therefore helping the body to correct electrical abnormalities in areas of disease or injury.

However, in order to adequately explain how the WellnessPro works, it is appropriate to begin by considering certain fundamental aspects of living tissue.

The body is made up of a vast number of cells. In many ways these cells act like tiny batteries, storing and releasing energy, doing their work of taking in nutrients, releasing waste products, repairing and reproducing themselves, etc. Each cell, like any battery, has a measurable electrical charge, which must be maintained in order to function properly.

Energy flows constantly between all cells throughout the electrical circuitry of the body. When various forms of damage or trauma occur to living tissue, there is a disruption in the electrical capacity of the involved cells and after an initial surge, a measurable decrease in the production and flow of energy occurs through the electrical network of the involved tissues. This condition is generally accompanied by pain in the affected area and often results in the body's inability to completely repair itself. Therefore, lengthy rest periods and inactivity are often prescribed in order to attain eventual restoration of normal function. The WellnessPro treatments have been likened to putting a "jump start" on the dead battery of a car. (Also known as "The Gate Control Theory").

Are there research findings available that support the use of the WellnessPro?

Yes, university and medical studies have found that Bio frequency technology positively effects the production of ATP and sodium pump effect in the Krebs cycle of the cell, thus enhancing the cell's ability to stimulate its regenerative, instead of a degenerative, phase.

In 1991, two research scientists, Dr. Erwin Neher and Dr. Bert Sackmann won the Nobel Prize in Physiology and Medicine, by detecting electrical currents of a trillionth of an ampere in the membrane, on the surface of a cell. These and other findings help support and substantiate the viability of the Wellness Pro technology over many other devices on the market that use outdated technology, are not laboratory tested for safety and efficacy, are not FDA approved, and produce tremendously inaccurate frequencies with little to NO results for the patient.

In addition the WellnessPro "Deep Pulse" technology ensures that you are getting the best and most accurate delivery of frequency to the affected area possible.

Additional research findings have shown increased range of motion, a decreased healing time and progressive wound healing through the use of Bio electrotherapy.

For more detailed studies visit our website www.electromedtech.com.

NOBELFÖRSAMLINGEN KAROLINSKA INSTITUTET THE NOBEL ASSEMBLY AT THE KAROLINSKA INSTITUTE

The Nobel Assembly has awarded the Nobel Prize in Physiology and Medicine in 1991 jointly to:

Erwin Neher and Bert Sakmann

Each living cell is surrounded by a membrane which separates the world within the cell from its exterior. In this membrane there are channels, through which the cell communicates with its surroundings. These channels consist of single molecules or complexes of molecules and have the ability to allow passage of charged atoms, that is ions. The regulation of ion channels influences the life of the cell and its functions under normal and pathological conditions. The Nobel Prize in Physiology or Medicine for 1991 is awarded for the discoveries of the function of ion channels.

Cells in the nervous system communicate with each other by means of such electrical signals of around a tenth of a volt that rapidly travel along the nerve processes. When they reach the point of contact between two cells - the synapse - they induce the release of a transmitter substance. This substance affects receptors on the target cell, often by opening ion channels.

The two German cell physiologists **Erwin Neher** and **Bert Sakmann** have together developed a technique that allows the registration of the incredibly small electrical currents (amounting to a picoampere - 10^{-12} A) that passes through a single ion channel. The technique is unique in that it records how a single channel molecule alters its shape and in that way controls the flow of current.

Neher and Sakmann conclusively established with their technique that ion channels do exist and how they function. They have demonstrated what happens during the opening or closure of an ion channel. They also showed how the channel regulates the passage of positively or negatively charged ions. This new knowledge and this new analytical tool has during the past ten years revolutionized modern biology, facilitated research, and contributed to the understanding of the cellular mechanisms underlying several diseases, including diabetes and cystic fibrosis.

I have a specific condition. Can these treatments help me?

Yes, Electromedical Technologies and our partner University research centers and clinics in Europe and in the US have overseen treatments using the Wellness Pro with outstanding results in the reduction of pain in a wide range of acute and chronic conditions, including the following:

- Wound healing
- Carpal Tunnel Syndrome
- Alzheimer's Disease
- Parkinson's Disease
- AIDS related Pain
- Broken Bones
- Soft Tissue regeneration Pain
- Herpes/Shingles
- Chronic Fatigue
- Arthritis-Osteo and rheumatoid
- Neurological Disorders
- Multiple Sclerosis
- Joint Pain
- Sports injuries
- Spinal cord injuries
- Plantar Fasciitis
- TMJ
- Neuropathy
- Cancer Pain
- Nerve Entrapment
- Bell's Palsy
- Fibromyalgia
- Acute and Chronic Back Pain
- Headaches / Migraines
- Disc injuries/Tendonitis
- Back Pain / Sciatica

NEW Breakthrough

in Technology & Medicine!

Wellness[®] Electrotherapy System *Pro*

What makes WellnessPro the #1 choice of health care professionals worldwide?

- Easiest to use on the market!
- FDA Cleared!
- New "Deep Pulse technology" for deeper frequency delivery to problem areas.
- No more confusing charts, tables or channels.
- The "Quickstart Chart" allows you to begin using the unit as soon as you open the package.
- Forgot how to use your unit? The Built in "i-Guide™" prompt system walks you through all steps of usage and programming.
- Digital Intensity controls.
- Ergonomic design with fully custom programmable functions for simple or advanced use.
- Select your own frequencies! **1 MILLION** to choose from!
- Select any combination of the 5 wave types, such as Burst, Spectrum, Sweep, Duplex or Continuous.
- Create your own Auto code programs.
- 1000 auto codes to choose from!

"YOUR Professional answer to better Health and Wellness!"

- The 4 lead output gives the utmost in flexibility for multiple stimulation points on the body and complete penetration ratio.
 - Ability for full contact electro massage and electro acupuncture using both hands.
- Tilted, Extra Large, 7" easy to read backlit LCD display with detail session information including total session time, lead intensity level with code and frequency description.
 - Backlit pushbuttons for added safety and clarity.
- Laboratory safety tested to highest FDA, ISO, ETL, IEC and CE standards for extra protection, accuracy and precision.
 - Accessories built to highest FDA, ISO, ETL, IEC and CE standards.
- New Carbon Surface electrodes for highest level of frequency penetration.
 - Do you travel? The WellnessPro electrotherapy system can be used anywhere in the world! (100V to 240 V).
 - Convenient equipment case to protect your investment.
- Ongoing research with partner universities around the world.
 - Unsurpassed customer support.
- Industry First! 3 year exchange warranty* (\$795 value) included with purchase.

What can I expect when I go for a treatment?

Normally a professional will administer the treatment by attaching either self adhesive or carbon rubber electrodes in a pattern that will be most effective or in a combination of both applied to specific areas of your body. An electrolyte gel may be applied depending on the attachments the practitioner will choose to administer in order to facilitate better conductivity of the equipment's output. If you begin to feel any discomfort, such as a stinging, let the practitioner know so that they can adjust the equipment accordingly.

Treatments vary in time but are generally up to one hour. Prior to beginning treatment the practitioner will discuss your case with you and ask questions about your situation to determine an appropriate starting point for treatment. Dress comfortably. You may need to remove some clothing to facilitate access to the areas of pain. During treatment you will experience a very relaxed state of mind. Contact your practitioner for more information.

When can I expect results from treatments?

Typical Patient responses vary from individual to individual and range from immediate and complete recovery in one treatment to an initial increased discomfort then slow and steady recovery. In some cases it may take 3-10 treatments before some breakthrough occurs.

The effectiveness and sustainability of the treatments as always not only depends on your practitioner it also largely depends on the patient and their commitment to supporting the healing process, which includes proper hydration, nutrition and physical exercise.

Are there side effects?

The most common side effect is the reduction and/or elimination of pain. Sometimes as a result of increased detoxification when using the unit, patients may experience atypical symptoms including but not limited to diarrhea, night sweats, headaches, nausea, flu-like symptoms etc. Make sure you consult your practitioner when you experience any atypical symptoms. According to many practitioners some atypical signs may actually be a good indicator that something is shifting within the body and the toxins are ready to 'move out.'

Is this like a TENS device?

The Wellness Pro has been FDA cleared as a TENS (Transcutaneous Electrical Nerve Stimulation) device in that it uses electrical stimulation to relieve pain, however, unlike other TENS devices on the market that have a very limited frequency range, the Wellness Pro has the largest frequency range coupled with a unique delivery system that blocks pain signals and helps increase blood flow and therefore enhances various effects of the body that stimulate the cell to a state of restoration and wellness, giving longer term results than any other device on the market.

If it's so effective, why haven't I ever heard of it before?

The technology has been available to the elite, practitioners and pro athletes for over 60 years. NBA, NFL, WBA and Pro PGA athletes currently use the Wellness Pro Technology. It has been used for decades throughout Europe and is in common practice in various hospitals and clinics. Electrotherapy applications are currently used in the Russian Space program. In the past few years Bio electrotherapy has become more available in the US. It has quickly started to open new possibilities and frontiers in the medical field for research and Wellness.

Can I buy the WellnessPro for myself?

Yes. If you are not a licensed medical practitioner, and you wish to use the instrument for your own home use, a prescription note is required from your doctor. However, if you wish to become a WellnessPro sales representative for Electromedical Technologies and adhere to the strict demonstration guidelines while presenting to medical practitioners no prescription is necessary.

NEWS Press Release

FDA OK's WellnessPro[®] Electrotherapy Device!

Electro Medical Technologies Announces FDA Clearance of WellnessPro[®]

Phoenix, Arizona. **July 7, 2007** - Designed for relief of pain such as any chronic, arthritic and post-surgical pain, the Wellness Pro[®] Transcutaneous Electrical Nerve Stimulation device is specifically made for Pain management and health rehabilitation. The device includes 1000 available Auto Code treatment programs, 1 million frequencies, option to fully program any frequencies, option to fully program any preset codes, 5 wave modalities and many other features that ensure patients receive appropriate electrotherapy treatment specific to their condition and treatment site. This new generation electrotherapy device also includes Deep Pulse[™] a unique technology which delivers optimal pain relief via use of endorphin release and gate control pathways.

Today the U.S. Food and Drug Administration (FDA) announced that it has granted clearance to market the WellnessPro[®] Transcutaneous Electrical Nerve Stimulation device.

"Our goal is to help improve the health and welfare of people around the world , by always being on the cutting edge of biomedical technology in the research, design, manufacture, and sale of instruments that alleviate pain, restore health, and extend life", said Matthew Wolfson, CEO Electro Medical Technologies.

Electro Medical Technologies has emerged as a global market leader in non-invasive, non-systemic pain management and physical rehabilitation.

The Wellness Pro[®] device is designed specifically for the relief of Pain such as any chronic, arthritic, and post-surgical pain. The portable device can be used at home or on-the-go, and integrates site specific, preset treatment programs that make it convenient and easy-to-use. This feature ensures that the patient receives the appropriate electrotherapy treatment, specific to their condition and treatment site.

Electro Medicals Senior Technology Director Dr. Jacob Kaufmann said, *"The Wellness Pro[®] product is the first of Cutting Edge new generation of electrotherapy devices that cannot be compared to any predecessor devices. WellnessPro[®] has the Largest Frequency Range available, yet is so easy to use that we believe patients will achieve faster results and predictable pain relief than anything on the market today. We believe that healthcare providers will take great comfort in knowing that their patients are getting the most advanced and appropriate electrotherapy treatment for their specific conditions."*

Electro Medical, would like to thank our team of scientists, doctors and researchers from the United States and Europe who contributed to creating the Wellness Pro[®] 2010, combining research from past electro medical pioneers with new breakthrough technologies in this field, allowing many thousands of people to achieve what is most important - **Incredible Results!**

The Wellness Pro[®] device is now available and has been released for distribution.

The Heart of Energy and Wellness

A Renaissance of Health and Self-Healing

What's Wrong with Health Care in America?

The Journal of the American Medical Association reports that approximately 40% of the U.S. population, or 100 million people, suffer from one or more chronic diseases. And over 180,000 people are killed annually by medical care - a rate equal to about 400 jumbo jet crashes per year. That is 8 crashes per week! Research published in peer-reviewed journals show:

- The side effects of medication properly prescribed and administered was the fourth leading cause of death in America, according to an article in the Journal of the American Medical Association.
- Nearly 100,000 Americans die each year from medical errors; according to a recent study by the Institute of Medicine.
- Over 80,000 Americans die annually from infections that they acquire while being treated in a hospital.
- Nearly 50% of the surgical operations in the United States are unnecessary and expose patients to serious risk of injury and death.

The old model of medicine is failing and we have to move toward a preventive, natural health care system. One of the emerging fields within the new natural health care paradigm is called vibrational medicine, or energy medicine, or energy wellness. Evidence-based energy wellness supports the innate self-regulatory and self-healing capacity of the human body.

Subtle Energies & The Energy of Wellness

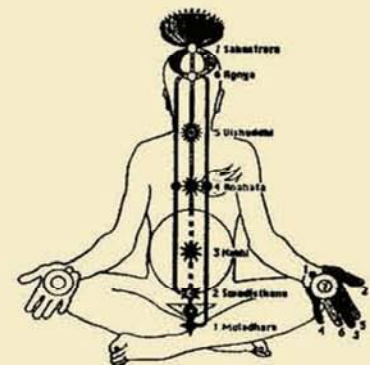

The basic unit of life, the cell, exists only because it is held together by energy. The atoms and molecules that make up a cell also exist because their various parts are held together by a bond of energy. Essentially, everything in the universe as we understand it is energy, manifesting in light and sound. Perhaps, as Einstein believed, there is only a single energy, "a unified field," but if so, it has countless faces. Numerous cultures describe a matrix of subtle energies that support, shape, and animate the physical body, called Chi in Chinese, Prana in India and Tibet, Nefesh in Hebrew, Ki in Japan; Sufis call it "Baraka", Christians call it the Holy Spirit ("Know ye not that ye are the temple of God, and that the Spirit of God dwelleth in you"), and the ancient Greeks called it "pneuma"; Hahnemann, the father of homeopathy, referred to it as the "vital force," and chiropractic calls it the "innate intelligence." Your body is made up of "energy fields" that form the foundation of your health.

Modern medicine uses only "vitality" but has no concept of a circuit for this vitality. Ukrainian quantum physicists, on the other hand, have been studying Giga-energy. They report that human DNA vibrates at 52 to 78 Gigahertz (billions of cycles per second); animals at 47 Gigahertz; and plants at 42 Gigahertz. They believe that this subtle energy, at one-billionth of a watt per cm², is the electromagnetic support system for "chi." This chi correlates almost identically to what traditional Jewish sources refer to as the Nefesh level of soul within the body. In the Bible (Lev. 17:11) it is written that "the soul (Nefesh) of the flesh is in the blood." According to the Chinese classics, the chi is called the "commander of the blood." As it is clear from Lev. 17:11, the Nefesh (chi) is the life force of the body.

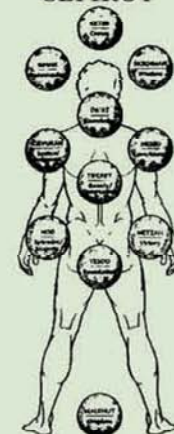

MERIDIANS

CHAKRAS

SEFIROT

According to the Aurvedic medical system of India, your body has seven major centers of both electromagnetic activity and vital energy (commonly known as **chakras**) that are powerhouses of energy. Studies have been conducted that show the electrical oscillations in the skin above the chakras are in the frequency of up to 1,600 cycles per second - as contrasted with 0 to 100 in the brain, 225 in the muscles, and 250 in the heart. (Study by Dr. Valerie Hunt, professor emeritus at UCLA, summarized in Richard Gerber's book *Vibrational Medicine*.)

Each chakra influences the organs, muscles, ligaments, veins, and all other systems within its energy field. Chakras also influence the endocrine system and so are strongly involved with your moods, personality, and overall health.

According to the theory of Chinese acupuncture, your body also consists of an "energy transportation system" known as **meridians**. These meridians not only feed vital energies to their related organs, they also reflect any pathological disturbance in those organs, thus providing physicians with a convenient and highly accurate tool for diagnosis as well as therapy.

According to the book *Energy Medicine*, disturbances in meridian energies correlate with ill health. Because disrupted meridian energies often precede illness, meridian readings are sometimes used to predict health vulnerabilities and prevent disease. Some government employees in Japan, for instance, are routinely screened during their annual medical examinations by a machine that has twenty-eight electrodes attached to the meridian endpoints. Only people with abnormal meridian readouts are required to go through further diagnostic testing!

Dr. Candace Pert, a research professor in the Department of Physiology and Biophysics at Georgetown University Medical Center in Washington, D.C., believes that the meridians may be the pathways that are followed by immune cells as they move up and down an anatomical highway.

According to the Jewish theory of healing, your body has 10 sefirot (spiritual energy centers). This energy enters the field of the body at the Crown (Keter) through the area of the fontanel, the "soft spot" on an infant's skull. Jewish sages also believed that a field of energy called Surrounding Light (the Aura) envelopes the human body. This Light extends 88 inches from the physical body and works like an ozone layer. The ozone layer protects living creatures from ultraviolet radiation emitted from the sun. Surrounding Light works in a similar capacity, shielding us from negative forces in our environment. When we behave with intolerance toward others and with egocentric behavior, we literally punch holes in our Surrounding Light, creating openings for illness to enter into our bodies. Christians depict this

Surrounding Light as the halo surrounding the head of saints and angels.

The body's energy centers - meridians, chakras or sefirot (depending upon one's belief system) - bring vital life energy to every organ in your body.

Keeping these energy fields balanced and removing blockages in the flow of this subtle energy plays a major role in determining your body's health. Balance is the key concept within energy wellness, just as homeostasis is a key concept within biology. All systems move toward an energetic balance, a state of harmony with other energies. **A primary benefit of the WellnessPro instrument is Pain Relief, which helps to balance the energy fields in your body!**

During the first few years of the 21st Century we will witness a grassroots explosion across America where people will begin taking responsibility for their wellness lifestyle, with optimum plant-based nutrition, antioxidant, botanical and nutrient supplementation, exercise, positive thinking, stress management, and demands for clean air, ecological sustainability (saving the rainforests, etc.), pure water, organic foods and a change toward a preventive natural health care system... while rejecting pharmaceutical-based medical solutions. People are fed up with the failure of modern medicine to solve chronic diseases, such as cancer:

- an estimated 1.2 million new cases of cancer this year;
- more than 560,000 lives lost to cancer last year, our second leading cause of death;
- more than \$110 billion in total health and related costs;
- a lifetime risk for developing some form of cancer of 1 out of every 2 men in this country, and 1 out of 3 women.

The WellnessPro instrument is for wellness. It does not have any side effects. It is not toxic nor invasive. It is FDA approved for any form of pain relief, acute, chronic or post operative. The WellnessPro instrument is in perfect harmony with the new self-care model of natural health.

If every day you make sure your energies are not blocked and are flowing freely, your body's innate healing system will counter virtually anything. Your body's wellness reflects the health, clarity, and flow in your energy field. Our advanced electrotherapy technology allows people to live pain free to stabilize and maintain the body's energy flow and helps to create a state of physical and mental wellness. **The WellnessPro can be yours NOW!**

Ask Your Doctor TODAY! START Living a Pain Free Life!

Stabilize YOUR body's energy flow and create a state of physical & mental wellness.
