

4Life® Transfer Factor Plus®

ADVANCED FORMULA

Far-Reaching Immune System Support

Inside your body there is an amazing protection mechanism called the immune system. It is designed to defend you against a variety of unfavorable elements that would love to invade your body and compromise your health. For this reason, it is easy to understand that maintaining a healthy immune system means living a healthier life.

4Life Transfer Factor Plus Advanced Formula provides far-reaching immune support. It combines the synergistic power of 4Life Transfer Factor Advanced Formula with the proprietary Cordyvant blend to support overall good health. Recent scientific studies report that this Advanced Formula boosts immune system activity 437 percent above normal immune response.¹

Key Points

- **Transfer factors:** Transfer factors are tiny molecules that transfer immunity information from one entity to another, such as between a mother and her infant who she breastfeeds. Transfer factors educate your immune system, thus supporting the recognition phase of an infection. This provides the necessary support for the immune system to be able to remember healthy immune function.

Developed exclusively by 4Life using patented and patent-pending technology, the Transfer Factor E-XF proprietary blend used in our Advanced Formula calls upon the knowledge of two sources, providing an enhanced combined effect of transfer factors from both cow colostrum and egg yolks. Research shows that the immune-supporting effects of this transfer factor blend are more potent than that of colostrum or egg sources alone.

- **Cordyvant:** Cordyvant contains ingredients that support the innate immune system, your first and instinctive response when your body is threatened. This blend contains known immune system nutrients, including:
 - Maitake and Shiitake Mushrooms*—long known to support T-Cell (immune system) and other health functions.
 - Cordyceps*—rich in polysaccharides, which help support immune system response.
 - Inositol Hexaphosphate*—gaining attention for its preventative immune power.
 - Beta Glucans*—an important immune cell stimulator. They are the “wake-up” call to white blood cells.
 - Soya Bean Extract*—a phytoesterol that has been shown to help activate immune system response.
 - Olive Leaf Extract*—may be instrumental in supporting healthy cell duplication.
- **Scientifically Studied:** 4Life researchers and scientists developed this Advanced Formula in an effort to further maximize immune system support using transfer factor molecules. Results of an independent study conducted at the Russian Academy of Medical Science conclusively showed the ability of 4Life Transfer Factor Plus Advanced Formula to propel Natural Killer (NK) cell activity to a remarkable 437 percent above normal immune response.¹

Did you know?

There are two types of immunity that protect the human body: innate and adaptive. Innate immunity is present at birth and provides the first barrier against microorganisms. Adaptive immunity is the second barrier to infection. The adaptive immune system retains memory of all invaders it has faced.

The two most abundant and safest sources of transfer factors come from cow colostrum and egg yolks. Transfer factor molecules can be shared safely and effectively. Whether they come from cow to human or from chicken to human, transfer factors are not species specific.

Technical Points

- Natural Killer (NK) cells are important immune cells that seek and destroy harmful cells through direct contact. When invaders enter your body, these NK cells are on the front lines of your immune defense.
- The extraction processes for transfer factors from colostrum and egg sources are protected by US patent 4,816,563, 6,468,534, and 6,866,868.
- 4Life Transfer Factor Plus Advanced Formula is so beneficial to individual health that it is include in RiteStart®.

1. Blind study conducted by Dr. Anatoli Vorobiev, Head of Immunology, at the Russian Academy of Medical Science. Cancer containing cells were subjected to Cytotoxicity testing. Samples containing 4Life Transfer Factor from cow and egg sources were tested individually and in blended forms for incubation periods of 24 and 48 hours to determine the most beneficial combination and activation time.

DIRECTIONS: Take two (2) capsules daily with 8 oz of fluid.

Serving Size: One (1) Capsules
Servings Per Container: 60

Supplement Facts

Amount Per Serving		DV%
Zinc (as monomethionine)	5 mg	22%
Transfer Factor E-XF™	150 mg	**
<small>A patented concentrate of transfer factors and other natural components from cow colostrum and egg yolk.</small>		
Cordyvant™ Proprietary	440 mg	**
Polysaccharide Complex		
IP-6 (Inositol hexaphosphate)		
Soya bean Extract (phytoestrols)		
Cordyceps sinensis (7% cordycepic acids)		
Beta-Glucan (from baker's yeast)(<i>Saacharomyces cerevisiae</i>)		
Beta-Glucan (from Oat)(<i>Avena sativa</i>)		
<i>Agaricus blazeii</i> Extract		
Mannans (from <i>Aloe vera</i>)(leaf)		
Olive Leaf Extract (<i>Olea europaea</i>)		
Maitake Mushroom (<i>Grifola frondosa</i>)(whole plant)		
Shiitake Mushroom (<i>Lentinus edodes</i>)(whole plant)(5:1 extract)		

****Daily Value (DV) not established**

Other Ingredients: gelatin capsule, lemon peel.
